## SUMMARY

Moch Sehan Restu is a fresh graduate from the Information Systems Department at the Faculty of Computer Science Engineering who has a strong interest in UI/UX design, logo creation, and branding using Figma and Canva. He is also enthusiastic about learning new things such as data analysis, business process optimization, management, and technology development. With experience in HTML, Tailwind CSS, JavaScript, and Laravel, he has expertise in UI/UX design, web development, and business process analysis. As a critical thinker and fast learner, he is driven by curiosity to continue to improve his knowledge. He also works effectively in a team, enjoys discussions, and has strong analytical and problem-solving skills. His work experience and involvement in organizations make him an adaptive, organized, and creative individual in designing engaging and informative user interactions.
